Chemical MED2275000 Boron trifluoride

Alerts

General Information

Chemical Code MED2275000

Chemical Name Boron trifluoride

Chemical Picture

General Detail Information

Classification CHEM CHEMICAL

State Description Liquid

CAS # 7637-07-2

Density ED2275000

Boiling Point 1008

Melting Point 2.3

Flash Point °C 4

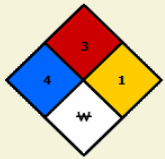

Hazard Risk Diamond

Flammability (Red) 3 :: Below 100 Degrees Fahrenheit

Health (Blue) 4 :: Deadly

Reactivity (Gold) 1 :: Unstable If Heated

Special (White) WTR :: Use No Water

Synonyms

Developed for Chemists and Facility Managers

Facilligence Chemical Inventory Tracking and Reporting (CITR) is based on integrated workorder and inventory control processes. Individual containers are tracked as mobile assets. Barcode labels are used for easy identification and record access. The same inventory control and optimization that Facilligence applies to part inventory is focused on chemistry. Our high-performance, relational database program tracks and maintains accurate, real-time chemical inventory information, yet it is easy to implement and use.

Facilligence CITR was developed specifically for the management and tracking of laboratory chemicals in regulated environments including pharmaceutical. It enables automated tracking of chemical testing data from the moment the material is received and also tracks samples, tests and results. CITR provides secure capabilities for tracking biological material and an integrated component manages reference standards. Facilligence delivers all the necessary tools to accurately track chemicals and supplies and meet safety and regulatory requirements, including barcode labeling, remote inventory control and document linking. Through Facilligence you have quick access to critical chemical MSDS information. This simple yet complete tool saves money in waste management with high disposal costs. You can eliminate duplicate ordering and excess purchases further saving money.

COMPLETE SOLUTIONS FOR YOUR CMMS/EAM/IWMS NEEDS!

Facilligence

Chemical Inventory Tracking

Track:

- ▶ Number of containers stored.
- ▶ Number of containers used.
- ▶ Expiration dates.
- ▶ Complete lifecycle of chemicals.
- ▶ Location of chemical containers.
- ▶ Permanent record of disposal.
- ▶ Emergency and Federal Homeland Security Reporting.

Comprehensive – Integrated Vehicle Management

Facilligence

Chemical Inventory Tracking

Meet Right-to-Know requirements and support efficient Chemical Management from the individual user to the enterprise level.

Role/Right based Security, DOD Level Password Controls at the Field Level

Facilligence allows the tracking of an unlimited number of material classes, including reference standards, with multiple security layers. Materials can easily be designated as GMP or lab use only, and inventories for individual business units can be maintained independently, within a single global database. The user interface can be adjusted based on roles and rights, allowing the customer to specify what data each individual can access.

Facilligence Chemical Inventory Features

- Container based tracking allows multiple lots, as well as unlimited vendors and sizes.
- Instantly search and locate a container based on the container id's which can be system or user defined.
- Disposal tracking maintains a permanent record of all disposed containers.
- Highly flexible security and fully customizable password support.
- Automatic email notification to management using system generated reports.
- Easy-to-use Ad Hoc reporting included.
- Structure and sub-structure searching capabilities.
- Threshold warning limits for both minimum and maximum conditions.
- Formulations-store a list of ingredients and produce batch records for scale-ability.
- Flag fields and reporting for DOT, DOD, NIOSH, SARA, TIER-2 and Form-R materials.
- Purchasing/Receiving module for accurate materials management and controlling costs.
- Remote inventory bar-coding module integrates Facilligence with PDA's and portable scanners.
- Easy-to-use in-line filtering for loading SQL queries.
- Externalized logic for ease of integration.
