Financial Management

Facilligence provides a powerful financial environment from the execution of workorders to the management of maintenance related financial controls.

Role and Right Based Security

Facilligence provides Department of Defense level password controls at the field level to allow you to concentrate on what matters most and not worry about security breaches regarding your data. All roles are controlled by security rights that can be customized down to the field level.

All of the screens in the system can be adjusted based on roles and rights, allowing you to specify the data each user can access. In addition, the system allows will track an unlimited number of accounts, budgets and cost centers with multiple security levels.

Complete Budget Management

Facilligence delivers budget management using chargeable and unchargeable (summary) budgets. Each cost on a workorder posts to a chargeable budget and all chargeable budgets automatically roll-up costs to their "parents". All transactions post as individual records that are auditable. Fiscal year start and end date limits are a standard feature as is the ability to declare a fiscal year.

Facilligence Financial Management Features

Facilligence is an excellent information tool that provides the ability to internalize financial management systems with parent / child relationships as well as the ability to maintain a cost account hierarchy in parallel. Cost accounting functions are supported with Cost Centers assigned to each workorder based on either the type of work, the location of the work, or the shop executing the work. Workorder costs may be allocated among many accounts by percentage or by authorized amounts. Workorder costs may be allocated to multiple buildings (or building / tenant relationships). Costs can easily be invoiced, capitalized or even charged as expense only.

About Facilligence

Facilligence is a flexible and robust EAM solution delivered to large enterprise clients as a turnkey solution. This premium product used by premier facilities is capable of managing your needs whether in a single plant or countrywide. Our staff's extensive facility maintenance experience has been incorporated into this program to assure that it meets the wide-ranging user needs for an array of organizations.

Facilligence is a flexible and highly advanced system that enables you to create the look and feel needed to exactly fit your facilities preferences. Use maps, photos, logos and other graphics to build a one-of-a-kind program customized for your facility.

Create workorders on equipment items, buildings, departments, building systems, locations, etc. such that every penny spent by the maintenance department is recorded, allocated, tracked and reported. Invoices for individual workorders or for entire projects can be maintained independently within a single global database. Spare parts inventory levels plus equipment warranty terms and conditions, failure histories and many other parameters are tracked, analyzed and reported.
