Facilligence Key Control

With Facilligence you get an enterprise level CMMS/EAM/IWMS software solution with a complete key module. This module is what locksmiths have always wanted. They will be surprised at the wealth of information made available at their fingertips.

Specific information can be entered for each key or key ring including the details of the key design and manufacture information. The locksmith will be able to track each individual key or key ring and see if it is available or who has it checked out.

Facilligence

Key Management

Advantages:

- ▶ Track key assignment from anywhere at anytime.
- ▶ Minimize the liability associated with lost or missing keys.
- ▶ Reduce master key vulnerability.
- ▶ Limit accessibility to authorized personnel only.
- ▶ Handle an unlimited number of keys.
- ▶ Assign individual user codes for increased security.
- ▶ Minimize the need to re-key when staff changes occur.
- ▶ Integrated control of key blanks and core data.
- ▶ Interfaces with automated key cutting machines.
- ▶ Provides on-demand reporting and user accountability.

COMPLETE SOLUTIONS FOR YOUR CMMS/EAM/IWMS NEEDS!

Facilligence Software Suite

Comprehensive - Integrated Key Control

Facilligence

Key Management

Key management, integrated workorder and complete key control at no extra cost.

Role/Right Based Key Security for Most Sensitive Facility

Facilligence allows tracking of an unlimited number of keys, including assignment rights and rules with multiple security layers. Access and related keys can easily be designated as global or limited use only. Keys for individual units can be maintained independently, within a single global database. The key control module can be adjusted based on roles and rights, allowing the customer to specify what data each individual can access.

Facilligence Key Control Features

- Secure control of all information so that only authorized personnel have access.
- Paperless tracking of all keys and access cards.
- Designate a key as a Master Key.
- Always know who is in immediate possession of the keys and key rings.
- Automate key cutting with blank and core details maintained in a central system.
- Easily recover assigned keys from terminating employees.
- Track repeated locksmith workorders on specific locks, locations, lock manufacturers and more.
- Assign keys to a key ring.
- Pertinent key information always available for a locksmith.
- Manage an entire key parent and child hierarchy while taking advantage of Facilligence records for all buildings and locations.
- Assign keys necessary to worksite access as a component of a workorder.
- Automatically alert management to overdue key assignments.
- Track multiple types of keys including jailer keys, electronic access cards, traditional passage keys, vehicle keys and more.
