## Comprehensive – Integrated Space Planning

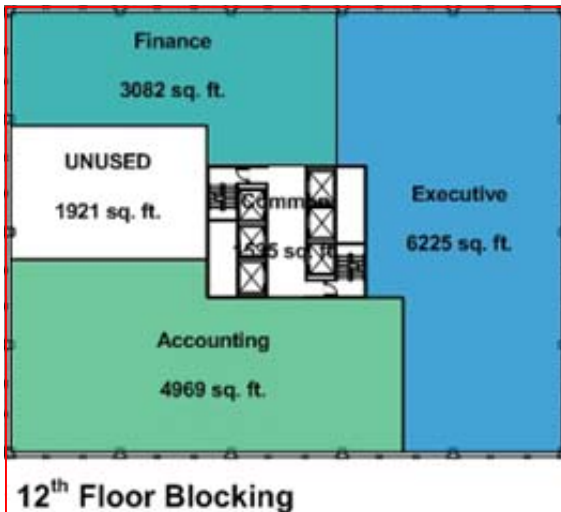

# Facilligence

## Space Planning

Facilligence is a fast and effective tool for the management of office space. This simple but complete software decreases operating costs and increases efficiency.

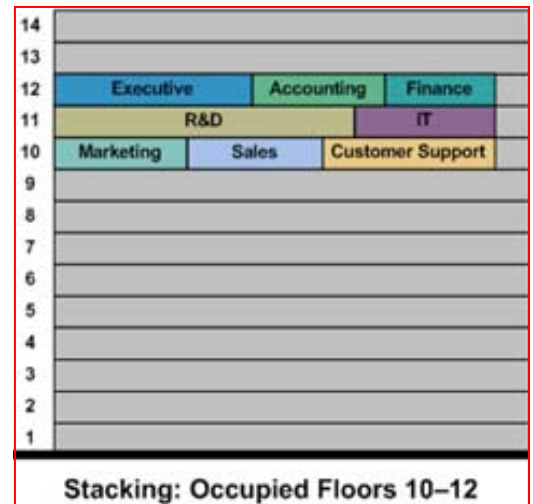

### With the Space Plan Solution you can:

- Import a CAD drawing or a scanned blueprint of your facility to get started.
- Quickly populate your drawing with printers, computers or any asset.
- Easily move those assets to keep track of changes, or have your drawing automatically updated from the Facilligence asset database.
- Obtain a summary report about the selected space.
- Manage Department moves and space allocations with workorders and linked drawings.
- Provide detailed FF&E specifications to support the procurement process.
- Assign the space to any employee.
- Use Detail sections to obtain specific information on every object, equipment, employee or space in the selected area.
- Use Pan and Zoom capability to focus on a selected section.
- Establish current and maximum occupancy for a space.
- Easily create complete and accurate space diagrams.
- Use graphic analysis to support emergency response with linked work assignments.
- Populate continuous monitoring data (Condition-Based Maintenance) from sensors and actuators.

Space plan blocking per floor with space allocations coming directly from the facility database.

Space planning multi-floor stacking utilizing department, facility data and "Building Book" lease / ownership terms and conditions.

### Don't Wait

See first-hand how the Facilligence CMMS/EAM/IWMS Suite provides everything you need for a healthy enterprise asset management program and to learn how Facilligence can have you navigate the deployment process. For more information on how Facilligence can help you achieve your goals call us at 972-636-1325 to arrange a demonstration or visit [www.FACILLIGENCE.com](http://www.FACILLIGENCE.com).
