Complete Vehicle Management

With Facilligence there is no need to use separate software to track the history of maintenance on a fleet of vehicles. Vehicle management includes fuel control interface ability, independent assignment of engines and transmissions, and full preventive maintenance. Facilligence will even manage the vehicle rental process.

All types of vehicles including emergency response vehicles, construction equipment and aircraft have been loaded into Facilligence to manage maintenance, parts, assignments and financial reporting. Barcode and RFID tags can be used to track the vehicle and its major VMRS key code components.

Integrate your motor pool, facility / plant maintenance with data from human resources, purchasing, security and finance without giving up control of the look and feel of your vehicle system.

COMPLETE SOLUTIONS FOR YOUR CMMS/EAM/IWMS NEEDS!

Facilligence

Vehicle Management

Facilligence vehicle management includes full preventive maintenance, independent assignment of engines and transmissions, tire management, warranty management, incident/accident management and fuel control interface ability.

Track mounted parts including tires with extensive detail. Track assignment to vehicles and individual warranties.

Fleet Maintenance

- Vehicles are tracked with extensive detail and maintained by mileage-based workorders all within one system.
- Does not require a separate database for vehicle management.
- Can track vehicle history from purchase to scrapping of the vehicle.
- Can schedule and record corrective and preventative maintenance repairs and service.
- Schedule vehicle inspections for the entire fleet
- Manage multiple warranties per vehicle with alerts as warranty expiration grows close.
- Implement Mission Readiness (MRI) condition analysis across your entire fleet.
- Run trend analysis on cost per mile by vehicle.
- Can maintain record of all parts and supplies consumed during the life of the vehicle.
- Interfaces with pump control systems.
- Manage both time and mileage requirements for maintenance.
- VMRS Compliant.
- Manage parts and tools using VMRS key codes.
- Use both 1-D and 2-D barcodes with scanner and camera recognition to manage part and tool inventories.
- Manage shop coordination with shift based assignment fleets (i.e. police cruisers, fire equipment, etc.) and track assignments by incident.
